

## ***Introducing exciting new cosmetic treatments to Shine Clinic***

***Regen-Lab – PRP (Platelet Rich Plasma)*** is the latest craze among the rich and famous and it is clear to see why. PRP is a safe and natural treatment utilizing the body's own platelets in plasma to stimulate collagen production in the skin. Platelets are rich in growth factors that stimulate increased cell turnover & collagen production. The results are improved skin tone & texture & reduced fine lines.

Ideal areas for treatment include the face, especially the under eye area, neck, décolletage and the back of hands.

**PRP** can be used alone or in conjunction with other rejuvenation procedures.

***Juvederm Voluma*** is a injectable hyaluronic acid filler used beneath the skin to give exceptional lift to areas of the face. As we age, the face loses volume, the skin becomes thinner and the effects of gravity become apparent.

Treatment with Voluma restores volume where it is lost. One of the most effective areas to treat is the midface and cheek area (the "pillow lift"). Another significant advantage with Voluma is its longevity with results lasting up to 2 years.

Voluma is a fantastic addition to our extensive range of dermal fillers.

**To discuss either of these two new treatments further or any other facial rejuvenation procedure, please ring to make an appointment for a consultation with Kathy.**

***Enjoy a Complimentary Blueberry Smoothie Facial Peel or Microdermabrasion with any injectable treatment \****

\*Valid to December 2009

To take advantage of this great offer, you just need to ring and mention this promotion when you make an appointment.

We look forward to seeing you at Shine.

Warmest regards,

Kathy, Lyndell, Sandra & Hannah
